Number of microbiological monitoring samples required:_____

Number of microbiological monitoring samples taken: _____

Did an M&R violation occur? Yes☐ No☐

If "Yes," check reason (s) below:
___Actual number of samples is fewer than required
___Did not collect/analyze repeat sample
___Did not collect/analyze for E. coli for positive total coliform from routine / repeat sample

Did an MCL violation occur? Yes☐ No☐

If "Yes," check reason(s) below (see also Part 5, Table 6 for additional information).

___For systems collecting less than 40 samples per month: two or more of the samples (routine and/or repeat) are positive for total coliform (= total coliform <u>MCL</u> violation).

___For systems collecting 40 or more samples per month: more than 5% of the samples (routine and/or repeat) are positive for total coliform (= total coliform <u>MCL</u> violation).

___The original sample was E.coli positive and at least 1 repeat sample was positive for total coliform (= <u>E.coli MCL violation</u>).

Reminder: System must collect a minimum of five (5) routine microbiological monitoring samples during the month following a repeat sample collection.

As required by 5-1.72, "Operation of a Public Water System," a copy of this form shall be sent to your local health department by the 10th calendar day of the next reporting period.
